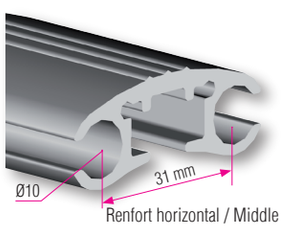
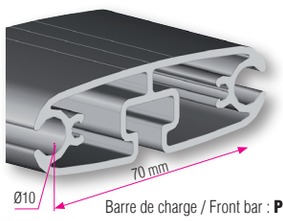
Maximum dimensions :
- Width: 6.00 m
- Height: 4.00 m

Wall installation / Sideways installation



Renfort horizontal / Middle section : **PU02**



Barre de charge / Front bar : **PU12**

Ce store à protection verticale permet une occultation complète. Ses coulisses latérales et ses renforts horizontaux assurent à la toile une rigidité parfaite. Ce store assure une protection contre les vents. Un loquet de verrouillage positionné sur le dernier profilé empêche la remonté de la toile sous l'action du vent.
La forme incurvée des profilés de renfort permettent un enroulement sur le tube.

This vertical awning can be mounted with blackout fabric; its side guides and its horizontal reinforcement aluminium sections enable a very high tension of the fabric and a good protection against the wind. The locking system at the bottom ensures a perfect tension.
The curved shape of the PU02 sections enables the rolling up and down together with the fabric.
